

CHILDREN SAFE UGANDA (CSU) END OF MAY 2021 REPORT

Dear Partners and Friends of Children Safe Uganda,
Greetings from Bweya
Hope you find this report on May progress interesting.

In order to enhance improved staff performance and quality of work, all our staff have been taken through a counseling trainings at least once every week and there has been great improvement.

Birthday Party Celebrations

It was fun and feasting as children were treated to a surprise birthday party Lunch which was fully organized and sponsored by **MEALS OF HOPE** headed by Chef Mike. A moment characterized by merry making, feasting on food varieties including liking ice cream left the children appreciating God for creating philanthropic men and women

Yields from the Home Garden

It has been a rewarding month to CSU's efforts in gardening as the tomato gardens yielded good harvests bringing excitement to both the staff and children. The garden has also continued to contribute a great part on supplementing the children's diet

Children's Studies

I feel bad to report that after escalating numbers of Covid-19 cases, all schools were again forced to close through the presidential directive as one way to control the spread of this horrible disease. It is indeed a hard time for the children mostly for those in classes P.1 to P.3 who were just waiting a day way to report back to school.

Conclusion AND Prayers

Dear Friends and partners of CSU, please pray for the work of BWEYA. And the children in particular; hey they are going through a difficult time after the closure of schools for a second time.

ii. Pray for Uganda and all people; everyone seems to be confused with the direction we are taking after the second wave of Covid-19 that is turning everything upside down and many deaths reported each day.

Our thoughts and prayers are also with you thanks for every support
Moses and Team
