END OF JULY 2021 REPORT

3rd August, 2021

Dearest Partners and Friends of Children Safe Uganda,
Greetings from Bweya mostly the Children and Staff; our constant prayers are with you all.

Hope you find this July Progress report interesting.

1. Life in the Lockdown

Since June, the country has been on a 42 days lockdown where several sectors including the schools were shutdown to combat the rapid spread of Covid-19. however, at CSU, our staff have used this period to engage the children in various life skill activities like craft making, digging, book making among others, besides the remedial classes

Am happy to report also that all our children who sat for primary Leaving Exam (PLE) and O level exams passed well in the recently released results.

2. Childrens' Health

Regarding the health of the children, we had a small number of children who suffered from various ailments which were treated and there is great improvement. Catherine Nabikkolo has been quite well with a few occasions of seizures but altogether, her appetite and interest in playing have not been affected.

When schools were locked down we have experienced a psychological challenge with many children questioning when will this situation of staying home ever end. It has been a tough period involving sessions of one on counseling and encouragement to children and staff. Even those in communities have been helped through the phone.

3. Facility Maintenance

Regarding facility maintenance, a number of items have been repaired which include one of the only latrine plus some furniture.

In the pictures are repairs on one of the toilets and the furniture from the dinning hall.

The Home Garden

It has been a hot season but am excited to report that we have managed to get some harvests from the garden mostly the Cassava and Matooke. More preparations for the next planting season is going on with the tomatoes nursery already completed. We have hope to get more yields in the next three months.

In the picture is the tomatoes nursery bed ready for transplanting

Conclusion AND Prayers

Friends and partners of CSU, in your regular prayers, please pray for the work of BWEYA. And the children in particular; it is a difficult time with questions on when they will be able to go back to school again
ii. Pray for the health of everyone, with the new variants the risk is very high.

Our thoughts and prayers are also with you thanks for every support
Moses and Team
